signed or expect to sign contracts as a result of exhibiting

Note: Figures based on 2016 edition

WorldBuild Baku is Azerbaijan's best-known trade exhibition and for the past 20 years has firmly maintained its position as the leading and largest construction, building, and interiors exhibition in the Caspian region. Its success can be attributed to showcasing the full spectrum of products and services for the country's ever-growing construction, building, and interiors markets. The show is co-located with HVAC event AquaTherm Baku and security event Securika Caspian.

Why Azerbaijan?

Azerbaijan remains a key transport and trade hub for the Caucasus. After recent weak oil prices, the country's economy is expected to recover in 2018. Industrial construction is a key sector for Azerbaijan's building industry, with billions of dollars being invested in projects launching in 2017 and 2018. Numerous infrastructure projects are also taking place with a particular focus on its capital Baku – a city on track to be comparable with world-renowned cities such as Dubai or Singapore.

Exhibitor Profile

The BakuBuild exhibition provides the best opportunity to demonstrate our whole range and the advantages of our company's products. The exhibition brings together buyers and sellers from different countries on one platform, and provides great benefits in the progress of the construction industry in Azerbaijan. We are pleased to be a member of such a professional forum and intend to continue this tradition for many years to come.

Araz Khankishili, Pimapenbrand
